

# VALUE ADDED SERVICE DANGEROUS GOODS

GENERAL

## Dangerous Goods

Shipments containing hazardous substances can be transported as long as they meet the requirements of the ADR. The ADR are the European regulations for the transportation of dangerous goods by road.

TNT Innight Benelux only accepts shipments with dangerous goods that meet the following conditions:

- |   |                       |
|---|-----------------------|
| • Limited Quantities (LQ)   | ADR Chapter 3.4       |
| • Excepted Quantities (EQ)  | ADR Chapter 3.5       |
| • 1000-points rule<br>with a vehicle load limit of max. 1000 points | ADR Chapter 1.1.3.6.3 |

Exceptions apply to certain substances or goods. These can be transported, provided they meet specific acceptance criteria. Contact your Account Manager for more information.

## Packaging/labeling

Dangerous goods must be packaged and labeled according to the requirements of the ADR. All packaging should be free from any damage/leakage or traces of the contents on the outside of the shipment..

Labeling must be immediately visible on the outside of the carton, pallet, (roll)container, etc. In the case of shipments outside the exemption rules of LQ/EQ (i.e. limited to 1000 points), they must be accompanied with complete and properly filled shipping documents.

To ensure that our operational processes can be conducted in a safe, effective and efficient manner, the goods with hazardous substances must be delivered separated from normal goods.

## Questions regarding the transportation of dangerous goods?

The Quality, Health, Safety & Environment Department of TNT Innight can provide customers with the right advice when shipping these type of goods.
